

SNAP RING PLIERS

HSP- 601 (straight type) 601B (curved type)

This tool is designed for removing and installing snap rings set in deep holes. Snap ring pliers are a special tool developed for removing snap rings from deep holes of calipers with cylinder-P units.

Available in ultra-slim and long types, one side of the tip is chamfered, so that these can be used to remove snap rings from narrow locations where ordinary snap ring pliers can't be used.

HSP-601

For calipers, wheel cylinders, etc.

HSP-601B

For motorcycle front forks, etc.
