

BEARING PULLER

NHBP series

This is a special tool which makes it possible to remove bearings in cases. Bearings can be removed even where there is no clearance between the bearing and the bottom of the case!

Bearings and bushings which are normally difficult to remove with ordinary bearing pullers, or in locations where ordinary pullers cannot be used, can be removed easily, securely, and rapidly.

* This tool is especially powerful with bearings where the bottom of the bearing does not penetrate the housing. Impact wrenches cannot be used in these instances.

- NHBP-10257

Applicable bearing inner diameters:

10 (also for 3/8" use), 12, 15, 17

- NHBP-2035

Applicable bearing inner diameters:

20, 25 (also for 1" use), 30, 35 (also for 1-3/8" use)

- NHBP-FS

Applicable bearing inner diameters:
NHBP-10257 + NHBP-2035

For use with pilot bearings in 2-ton vehicles to large-sized vehicles
Pilot bearing puller

- NHBP-1730

Applicable bearing inner diameters:
17, 20, 25, 30
