

VALVE COTTER TOOL

VP-939MC

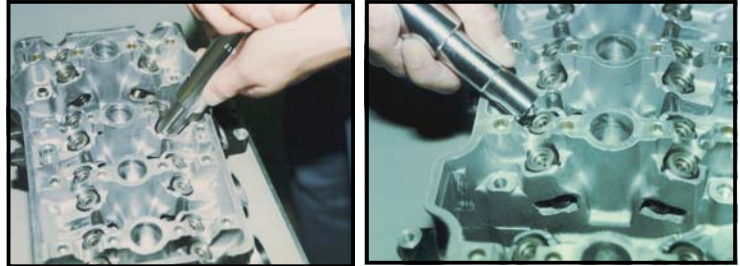

Valve cotters and valve springs can now be installed and released easily, at a single touch. This tool can be used with motorcycles, mini-cars, and compact passenger vehicles!

Ideal for DOHC 4-valve engines

Powerful magnets eliminate worries of cotters falling into spaces too narrow for fingers to fit into.

No detailed technology such as tweezers or forceps needed. Even 16-valve heads can be easily assembled, all at once.

* Because of the powerful spring tensile force, this tool cannot be used with some vehicles, such as the Yamaha SR.

Part names and code numbers

-11 Support -14 Spring for dolly block -09 Attachment (main unit) for installation

-12 C-ring -10 Dolly block -13 Spring for support

Magnet -01 Handle

-035 Large (φ 26.5) -02 C-ring(22)

-068 Small (φ 21)

Attachment assembly for disassembly
